

Ultimate Texas Hold 'Em

The Game

Ultimate Texas Hold 'Em is a new and exciting game where you can win up to 500 times your wager! Your cards play against the dealer's cards, where the better the poker hand, the better the payout! Additionally, the game allows for aggressive play; the earlier a player bets, the more that can be won.

The Play

Play begins with a player making equal bets in the "Ante" and "Blind" areas of the layout; both bets are mandatory. There is an additional optional side wager called "Trips" that can also be made at this time. All players and the dealer will be dealt two "Hole" cards, followed by 5 community cards placed on the layout face down. Betting begins at this time. If a player believes their hand can beat the dealers after seeing the first two cards, a "Play" wager is made of three or four times the Ante wager; otherwise a player may "check" to wait and see more cards.

The dealer will turn over three of the community cards, also known as the "Flop". Players now have the option of wagering two times their Ante on the Play only if they haven't already wagered, or check again.

Finally the dealer will turn over the final two cards (the "River"). Players that did not wager on the Play must place a wager the same amount as the Ante (1x the wager) or "fold". If a player folds at this time, they will lose their Ante and Blind bets; the Trips wager if made is still active. The player must alert the dealer they have a qualifying Trips wager prior to folding. If a player folds at any time prior to this point, all wagers are forfeited.

Players and the dealer will turn over their cards and make the best five card poker hand. For a player to be paid on the Ante wager, the dealer must "qualify" with a pair or better. If the dealer does not have a pair or better, the Ante wagers will be returned. For a player to be paid on the Blind wager, the hand must beat the dealers and the hand must consist of a Straight or better.

If the player's hand beats the dealers qualifying hand with less than a straight, their Ante and Play wagers will be paid even money and the Blind bet is a "Push". If a player's winning hand is a straight or better, the Ante and Play wagers are paid even money and the Blind wager is paid at the posted odds. If the dealer beats the player, the Ante, Blind and Play wagers are lost. If the player and dealer have equal hands, it is a Push and no money is paid or lost.

Ultimate Texas Hold 'Em

If the player has made the optional Trips wager, it wins or loses based on a pay table and will be paid even if the player loses the hand.

Pay Tables

The Blind wager is mandatory and must be equal to the Ante wager. Winning Blind wagers will be paid at the following posted odds:
