The payoff on a winning selection varies according to the odds.

**EXAMPLE:**

<table>
<thead>
<tr>
<th>DRIVER</th>
<th>ODDS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jimmie Johnson</td>
<td>6 - 1</td>
</tr>
<tr>
<td>Kyle Busch</td>
<td>8 - 1</td>
</tr>
<tr>
<td>Kasey Kahne</td>
<td>50 - 1</td>
</tr>
<tr>
<td>Ryan Newman</td>
<td>100 - 1</td>
</tr>
</tbody>
</table>

To wager on auto racing, you typically pick the winner of the race.

Typically, 20-30 drivers will be listed along with a “field” (all others).

For example, if the player wagers $10 on Kyle Busch and he wins the race, the player wins $80 plus their $10 back totaling $90.

**PROPOSITION WAGERS:**

<table>
<thead>
<tr>
<th>DRIVER</th>
<th>ODDS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jimmie Johnson</td>
<td>- 130</td>
</tr>
<tr>
<td>Kyle Busch</td>
<td>+ 110</td>
</tr>
</tbody>
</table>

Auto racing match-ups pit two drivers against each other in a head-to-head wager. The driver with the better finish in the race wins the match-up. Sometimes multiple drivers are listed in a group where the best finish in the group wins the wager.

In the example, a wager on Jimmie Johnson for $13 wins $10, returning $23. Wagering $10 on Kyle Busch pays $11 plus the wagered $10 back for a total of $21.

Other props may also be posted, such as the over/under on the number of cautions in the race or which car manufacturer wins.

Lines can be found on other series and open wheel races.
